Sarah Epting, Grants Coordinator for the Center for Research in Nutrition and Health Disparities will openly admit to being a junk food "junkie" when she first began working with the Center, almost 9 years ago. Deep fried and snack cakes were often part of her diet. However, over the years, a transformation has taken place, which

she attributes to her time with the Nutrition Center, and the positive influence of the efforts taking place here. These changes have not only brought a healthier lifestyle for her and her family, but now to others around her.

Over the years, Sarah has completed several programs, including the Master Gardener Program, and Clemson's Canning Coach training. She now serves on a committee with the Newberry Master Gardeners, planning the Farmers Market there. Most recently, Sarah graduated from Clemson's SC New and Beginning Farmers Program. The SCNBRP helps new and beginning farmers be successful, productive and innovative members of their agricultural communities. Now, along with working budget numbers for our Nutrition-related research, she is also the owner of Homestead Acres, LLC, a small, diversified farm. With her farm, she hopes to practice what so many members of the Nutrition Center community hope to see, by providing sustainable, healthy food, to our local population. Congratulations Sarah!
